Open End Tracker Certificate on OpenMetrics-JIMAG Global Equity Regions Stability Index

The financial instruments mentioned in this document are derivative instruments. They do not qualify as units of a collective investment scheme pursuant to art. 7 et seqq. of the Swiss Federal Act on Collective Investment Schemes (CISA) and are therefore neither registered nor supervised by the Swiss Financial Market Supervisory Authority FINMA. Investors do not benefit from the specific investor protection provided under the CISA.

OPENMETRICS-JIMAG GLOBAL EQUITY REGIONS STABILITY INDEX

The OpenMetrics-JIMAG Global Equity Regions Stability Index (Index) is a quantitative strategy developed by OpenMetrics Solutions LLC. It dynamically allocates between six equity-focused exchange-traded funds (ETFs) and a cash ETF for downside protection. The Index aims to provide an improved risk/return profile compared to a passive investment in the six equity ETFs and to protect against major drawdowns during severe market crises.

CONCEPT

Equity markets undergo sudden changes in their dynamic. Changes occur if new price information cannot be explained with the dynamics of older price information (i.e. a change in the trend and/or a change in risk). Dr Tobias Setz (CTO - OpenMetrics Solutions LLC) in his doctoral thesis titled "Stable Portfolio Design Using Bayesian Change Point Models and Geometric Shape Factors" developed an innovative approach to extract trend, risk information and regime change probabilities from historical price data.

The OpenMetrics-JIMAG Global Equity Regions Stability Index combines all three factors (trend, risk and regime change probabilities) into a stability indicator per equity ETF. In addition, all six equity indicators are adjusted by their regional factor (North America: 52%, Europe: 20%, Pacific: 8%, Asia: 14%, EMEA: 3.2% and Latin America: 2.8%). Regional factors are stable and approximated based on market capitalisation data from global indices. Any remainder not allocated into the six equity ETFs is allocated to the cash ETF. The Index is rebalanced once a month based on the then prevailing indicators.

Conflict of interest: The Leonteq Entity or its affiliated companies may operate as market maker for the financial products, may trade as principal, and may conclude hedging transactions. Such activities may influence the market price, the price movement, or the liquidity of the product and/or its underlying.

Past performance of underlying: The past performance of the underlying is not indicative of its future performance.

Fees: The purchase of the products triggers costs and fees. Financial institutions or intermediaries that distribute the products may be compensated by purchasing the products at a discount to the issue price, receiving a reimbursement or payment of a fee, in each case as specified in the legal documentation for the products.

Market fluctuation: The value of the products is subject to market fluctuation which can lead to a partial or total loss of the invested capital.

Leverage: If the product is a leveraged product, the leverage may magnify the exposure to market fluctuation and increase gains or losses.

Currency fluctuation: Returns may increase or decrease as a result of currency fluctuations.

Coupons: If the terms of the products provide for conditional coupon payments, there is no guarantee that the conditions for obtaining such coupons are met (and therefore the amount of coupons paid is not guaranteed and could even be zero).

Tax: The tax treatment of the products depends on the individual circumstances of each investor and may be subject to change in the future.

Selling restrictions: The issuance of the products is subject to Swiss law. The products may not be sold or offered in any jurisdiction other than in compliance with all applicable laws and regulations. The products have not been and will not be registered with any local securities and exchange commission. Unless otherwise specified in the legal documentation of the products, the products are offered on a private placement basis only and no action has been taken to permit a public offering of the products (including via mass media). Selling restrictions apply for multiple jurisdictions, including the **EEA, the United Kingdom, Monaco, Hong Kong, Singapore, Japan, Switzerland, Chile, Brazil, El Salvador, Uruguay, Peru, Bahamas, Andorra, the USA and US Persons**. Detailed information with respect to the applicable selling restrictions are available in the legal documentation of the products and on <https://ch.leonteq.com/legal/selling-restrictions>. The existence of selling restrictions for a certain jurisdiction does not, per se, constitute an approval of the distribution of the relevant products in such jurisdiction by any financial institutions or intermediaries.

USA and US Persons: The issuer and/or the lead manager will not register the products under the U.S. Securities Act of 1933, as amended (the "Securities Act") or any other securities law. The products may not be offered or sold within the United States except by Leonteq Securities AG and its affiliates to distributors pursuant to exemptions from registration under the Securities Act, including but not limited to Section 4 (a)(2) thereof, Regulation D, or other applicable exemption from registration under U.S. securities law. Accordingly, **the products may only be offered and sold outside the United States to non-U.S. persons (within the meaning of Regulation S under the Securities Act) in offshore transactions** in reliance on Rule 903 of Regulation S. The products are subject to restrictions on transfer. Please see section "Offering and Sale" of the issuance programme of the respective products.
